Pitchlight

YOUR PRIVATE AI COPILOT FOR CLIENT CALLS

Walk into every client call prepared.

Your talking points, answers and client context, ready the moment the conversation gets difficult.

Free to try · No credit card · Works in Chrome

THE MOMENT THAT MATTERS

The client asks something hard. Your mind goes blank.

You are listening, talking, watching the clock and trying to remember the price, the proof and the next step, all at once.

36%

fear **forgetting their words** when presenting.

33%

fear **freezing** in front of other people.

28%

fear **losing their train of thought**.

MEET PITCHLIGHT

A copilot that helps before, during and after every call.

1

Prepare

Paste your material. Get a script, key points and answers to the hardest questions.

2

Listen

It follows the conversation live and knows what the client just asked.

3

Guide

The right answer and talking point appear in a small bar only you can see.

Floats on top of Zoom Google Meet Microsoft Teams Webex

Tips are text only. Nobody else on the call sees them.

1 · PREPARE

Never face a blank page.

Paste a product page, deck text or notes. Pitchlight drafts everything you need to walk in ready, and you edit it your way.

A script

Opening, their situation, what you do, proof, price and fit, and the next step.

Hard questions, answered

The questions clients really ask, with answers and replies to common objections.

A one-page cheat sheet

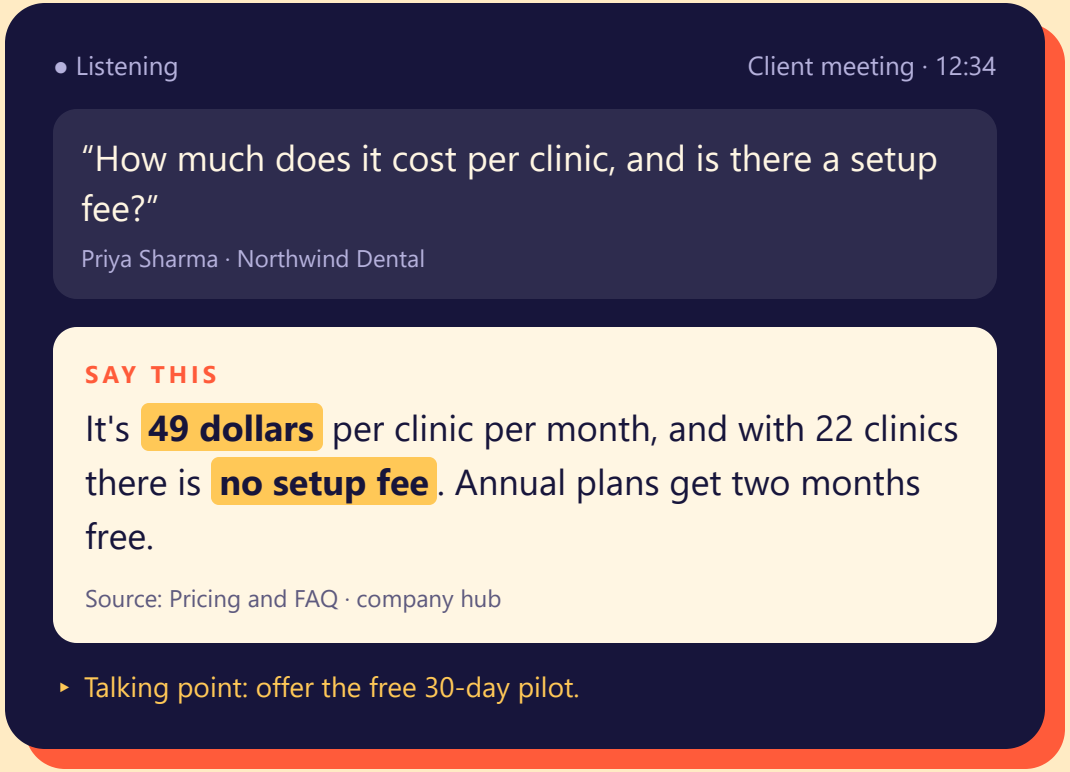

Key points on one page, plus a list of facts still missing from your notes.

Grounded in what you provide. Gaps are marked **[add: ...]**, never filled with guesses.

2 · DURING THE CALL

The client asks. You get the exact words.

- **Ready-to-read answers** in seconds, grounded in your documents.
- **Source shown** so you can trust what you say.
- **Not in your notes?** You are told, not guessed at.

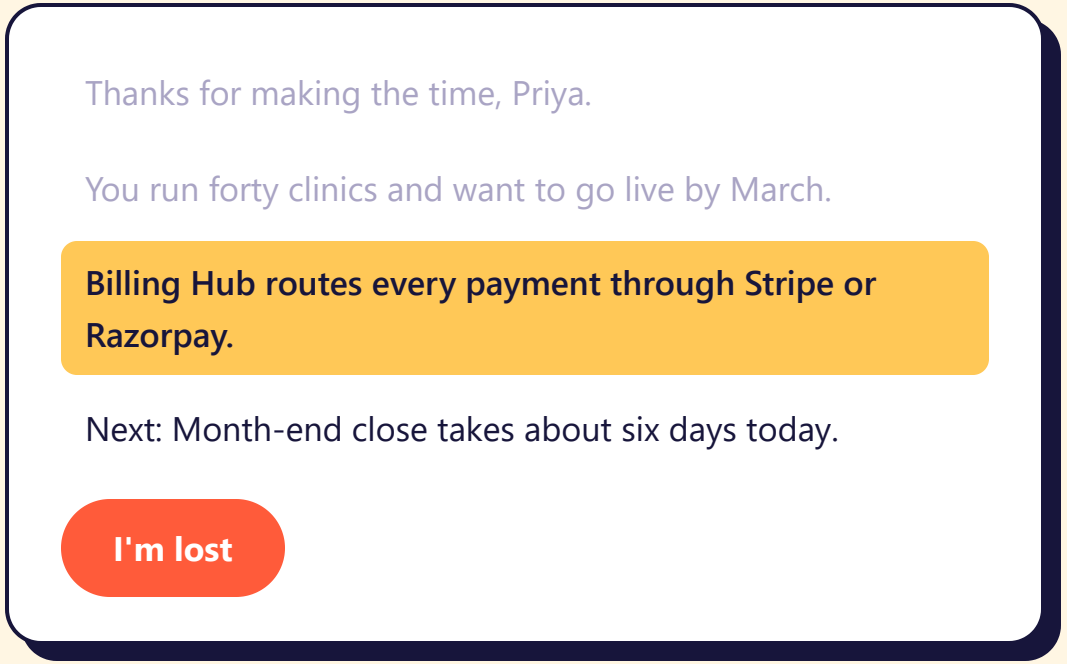

Illustrative example. Your answers come from your own documents.

2 · DURING THE CALL

A script that follows your voice.

- Your **next line is highlighted** as you speak. Lines you've said fade away.
- Skipped a section? It is **flagged** so nothing is forgotten.
- Lost your place? Press **“I'm lost”** and see exactly where you are and what to say next.

Illustrative example

ONE SOURCE OF TRUTH

Every deck and document, one company knowledge hub.

Admins upload decks and documents for each business. Asked about a product you didn't prepare? The coach finds it there and names the document it used.

Your notes first

Your own documents are searched before anything else.

Then the company hub

PDF, PowerPoint, Word, text and more, grouped by business.

Honest when unsure

Not in either? You hear “not in your notes”, so you can offer to confirm.

Only admins change the company hub.

2 · DURING THE CALL

Objections handled live.

Price, competitor, timing, approval. Your prepared answer comes first, then three ways to respond.

“That seems too expensive.”

1. **Acknowledge** the concern.
2. **Answer** with your prepared reply.
3. **Ask back** with a question that moves it forward.

Quiet coaching on the side

Gentle nudges on filler words, pace and eye contact. Your talk-time is tracked. Promises made by you and by the client are noted for the follow-up.

3 · AFTER THE CALL

Walk out with the follow-up already written.

Recap

Summary, decisions, action items and commitments, yours and theirs.

Follow-up email

Ready to send, using the client's name and the details from the call.

Question review

Each question asked, how you answered, and a stronger version to try next time.

Readiness check after a rehearsal: **Ready** **Almost** **Not yet** with the top fixes to make.

ALSO INCLUDED

Rehearse alone, any time.

The practice app coaches you live on filler words, pace and eye contact, then gives you a scored review.

AI role-play

Rehearse against an investor, interviewer or client who asks real follow-up questions.

Live coaching

See pace, fillers, repeats and eye contact while you speak, and which key points you've hit.

Scored review

Scorecard, transcript and video replay, so you can see progress version by version.

PRIVATE AND DISCREET

Guidance only you can see.

- **Invisible to the client.** Tips are text on your screen. The coach never speaks into the call.
- **Private to each person.** Every user has their own account, scripts, documents and history.
- **Shared only where you choose.** The company hub is the one shared space, and only admins change it.
